

To whom it may concern:

BASF Corporation, Wyandotte is pleased to provide this letter for PURPLAN USA, Inc. for the company's excellent work on our newly constructed PUR Slab Cooling (Waterbath) equipment.

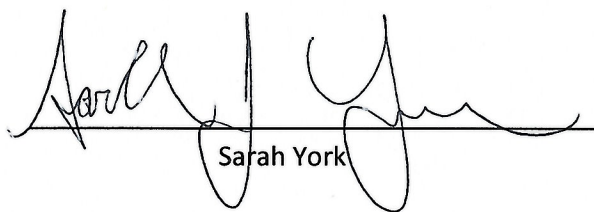

BASF Corporation, Wyandotte has engaged PURPLAN USA in 09/12/2017 for the Slab Cooling (Waterbath) Project. The task was, to design and deliver automated turnkey-ready process equipment in order to produce TPU slabs continuously. A significant amount of detailed engineering and project management was necessary to turn this project into success.

The equipment installation for the Slab Cooling (Waterbath) unit started on 05/22/2018. All the work was carried out in an existing working environment. Needless to say, that PURPLAN's team is used to work in such an environment. All the work, including hot work permits and heavy lifting equipment, was carried out professional and in a safe way.

The overall project was completed on time and on budget and has been running efficiently starting on 08/03/2018.

BASF Corporation, Wyandotte and PURPLAN USA have developed a mutually beneficial partnership over the course of this project. We look forward to working with the professionals at PURPLAN on future projects.

We can highly recommend PURPLAN USA Inc. as an excellent services and equipment supplier for companies in the chemical industry and related industries.
