Reference Letter – PURPLAN USA

To whom it may concern:

Fehrer Automotive is pleased to provide this reference letter for PURPLAN USA, Inc. for the company's excellent work on our newly constructed PUR Tank Farm.

Fehrer Automotive engaged PURPLAN USA in December of 2016 as a turn-key supplier for our Polyol and Isocyanate tank farm. This tank farm included multiple automated valves, pumps and one two tank truck unloading stations.

In addition to this tank farm PURPLAN USA also supplied dosing and mixing equipment to blend bulk Polyol with additives and catalysts. This system included load cells, dosing valves, storage shelves and HAZMAT storage locker.

PURPLAN USA also supplied electrical automation control system including all sensors, load cells, and control valves. The related PLC software and recipe control system (including a bar code scanner) was also part of the scope of supply.

The equipment installation started in February of 2017 and was completed in early May, 2017. PURPLAN was engaged to perform Project Management including coordination of all subcontractors and material deliveries onsite. During installation, the crew onsite had an average of 15 craft professionals (welders, fitters and electricians).

All PURPLAN equipment deliveries were on schedule. The overall project was completed on time and within budget. The PUR tank farm was started up and commissioned in May of 2017 and is running efficiently.

Fehrer Automotive and PURPLAN USA have developed a mutually beneficial partnership over the course of this project. We look forward to working with the professionals at PURPLAN on future projects.

We can highly recommend PURPLAN USA as an excellent services and equipment supplier for companies in polyurethanes products manufacturing and related industries.
